Subject: Mining companies turn to renewables - summit announced

[Click here to view the browser version.](#)

We are excited to announce the launch of the 2nd **Renewables and Mining Summit**, taking place June 23-24 at the Hilton Sandton, **Johannesburg**. Built on the success of the first, sell-out Summit in Toronto 2013, the Africa event will bring together hybrid and renewable energy solution providers with the mining energy decision-makers who are looking to lower energy costs with a guaranteed supply.

Solving Mining's Energy Dilemma with Alternative Energy Solutions

Faced with spiraling energy costs and increasing supply challenges, African mining operations are looking to diversify their energy mix to secure power and stabilize pricing. Many mining companies are already exploring the potential cost savings

and supply sustainability that renewables offer.

The **Renewables and Mining Summit** will bring together for the first time, the African mining sector and the global renewables industry to explore the technologies, solutions and the power project opportunities for both remote and grid-tied operations.

Hear from key representatives from industry-leading mines including:

- **AngloGold Ashanti • African Rainbow Minerals • Gold Fields**
-
- **Anglo Platinum • ArcelorMittal South Africa • Anglo American**
-
- **Cronimet Power Solutions • PPC Limited •**
- **REVINSAMB Mineral Mining Holding • Glencore Ferro**

Alloys

The case-study dominated event will feature the mining companies currently deploying or seeking to use alternative energy sources in their African projects. Mining leaders will be joined by global renewable energy experts including:

- **Standard Bank • SunEdison • Sembcorp • SolarPower Africa • Kabi Solar •**
- **Bio2watt • Council for Scientific and Industrial Research •**
- BioTherm Energy • National Department of Environmental Affairs • A.T. Kearney**

Key reasons to attend the **Renewables and Mining Summit**

- 1) Explore the hybrid and renewable solutions that deliver cost-effective and reliable power for grid-tied and remote mine sites
- 2) Hear the operational experiences from key mining industry players already deploying renewables
- 3) Understand the finance options available from experienced regional investors
- 4) Learn how renewables projects are supported by government and utilities

- 5) Benchmark the future energy supply strategies within the region's mining sector
- 6) **Reduce energy costs and increase the reliability of supply for mine sites**

Full details at www.energyandmines.com/africa

Promotional launch price ends April 30th

About Energy and Mines

A part of **Canadian Clean Energy Conferences, Energy and Mines** brings together the mining and renewable energy sectors to find cost effective and reliable energy solutions to meet mining's energy challenges through our global event series, hub site, research reports and awards.

*"The **Renewables and Mining Summit** in Toronto was a timely and excellent event, especially the business networking. There are many challenges ahead but the conference provided a milestone for the required discussions. The convergence of mining companies, developers, vendors and others at this event was valuable."*

- Sunil Kumar, Director, Energy Strategy, **Kinross Gold**
